NOTES TO AND FORMING PART OF STANDALONE BALANCE SHEET AND STATEMENT OF PROFIT AND LOSS FOR THE YEAR ENDED
31st March, 2024

I Provision For Current And Deferred Tax

Provision for current Income Tax and Wealth Tax are made after taking into consideration benefits admissible under the provisions of the Income Tax Act, 1961. Deferred Tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that are enacted or substantively enacted as on the balance sheet date. The deferred tax asset is recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset can be realized.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

J Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as Current Investments. All other investments are classified as Long Term Investments. On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. Both current investments and long term investments are carried in the financial statements at cost. On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

K Current Assets, Loans & Advances

In the opinion of the Board and to the best of its knowledge and belief the value on realisation of current assets in the ordinary course of business would not be less than the amount at which they are stated in the Balance Sheet and repayable on demand.

Income and expenditure is recognized and accounted for on accrual basis. Revenue is recognised to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.
